

Hybrid Onion Rising Sun

DESCRIPTION:	Medium-early, short -day onion planted in fall for spring/early summer harvest. Exhibits strong bolting tolerance with good sizing (colossal, super colossal), high percentage single centers and very nice uniform globe shape.
MATURITY:	Medium early
COMPARABLE VARIETIES:	Don Victor, Samurai, Lancelot, Golbi, Gabriela
VARIETY CHARACTERISTICS:	Rising Sun matures medium-early and finishes with tight, thin necks. The onion shows a strong root system producing sizes mostly in the 3.5 to 4.0 inch-plus range. In addition to the agronomic benefits, Rising Sun tests at less than 5 on the pungency rating scale giving it a nice mild flavor.
MARKETS:	Suitable for fresh and process markets.
ADAPTABILITY:	Southwest U.S. and Northeast Mexico

FEATURES

- Sweet, mild flavor
- Medium-early maturity
- Tight, thin necks
- Strong tolerance to bolting
- High percentage single centers
- Uniform globe bulbs reach good size

BENEFITS

- Consumer appeal
- Early market opportunities
- Cures down quickly
- Good yield and pack out
- Good yield recovery
- Desirable market characteristic

Descriptions, illustrations, photos and disease resistance, etc. are based upon the results obtained under favorable conditions and certain races of pathogens/diseases. Identical results are not guaranteed nor implied for all growing conditions. Information is based on average data compiled. Physical characteristics, adaptability and disease tolerance may vary under different conditions. Rev B
