Hybrid Broccoli Thunder Dome

DESCRIPTION: Thunder Dome is a high-dome hybrid broccoli. Grows well under low temperatures, tolerant to anthocyanin discoloration. Fine beads, dense compact green head, heavy weight.

MATURITY: Matures +/- 95 days after transplant.

COMPARABLE VARIETIES: Avenger, Millenium, Hancock, Tlaloc

CULTURAL CHARACTERISTICS: Best suited as transplant, 10" plant spacing, drip irrigation (avoid overhead-sprinkler irrigation). Thunder Dome has a vigorous upright plant habit, with a low head set and thick stems tolerant to hollow stem and brown bead.

MARKETS: Fresh market crown cut, freezer market florets – high process recovery rates.

ADAPTABILITY: Winter season harvest Dec – March: Mexico, Central America; March: Arizona

FEATURES

- Smooth, medium-high dome
- Compact, uniform beads
- Medium sized stalk
- Vigorous, upright plant frame

BENEFITS

- Consumer appeal
- Good harvest weight
- Field tolerance to hollow stem
- Reduced sun exposure to head /brown bead

Descriptions, illustrations, photos and disease resistance, etc. are based upon the results obtained under favorable conditions and certain races of pathogens/diseases. Identical results are not guaranteed nor implied for all growing conditions. Information is based on average data compiled. Physical characteristics, adaptability and disease tolerance may vary under different conditions.
