

# Hybrid Cucumber VR Summer Top

DESCRIPTION:	Japanese burpless cucumber
MATURITY:	Intermediate
COMPARABLE VARIETIES:	Summer Top
CULTURAL CHARACTERISTICS:	VR Summer Top produces uniform fruit that is glossy, deep green and 8.5-9.0 inches long. Fruit weight is 90-100 grams. Fruit has crisp flesh. It has Monoecious flowering habit. 40-50% female flowering on the main stem and 60-70% on lateral branches. Its strong vine produces many lateral vines for high yields.
RESISTANCE:	Powdery mildew and Downy mildew, intermediate resistance against ZYMV (Zucchini yellow mosaic potyvirus)

## Note:

- Lateral vines grow slowly compared to Summer Top, which enables growers time to adjust vines at the appropriate time.
- Maintain good ventilation and allow plants get adequate sunlight by removing leaves as needed.
- Grafting with Squash rootstock can help plants maintain vigor to produce fruit for a longer period.
- American Takii's Squash rootstock called "Titan" is recommended.
