

Hybrid Onion Centerstone

DESCRIPTION:	Yellow onion, Spanish/hard, strong plant habit, stores well
MATURITY:	Long-day type, with main season maturity
COMPARABLE VARIETIES:	Sabroso, Calibra, Granero
VARIETY CHARACTERISTICS:	Centerstone has very good bolting tolerance, a globe shape with a high percentage of jumbo sizing and single center cuts. Pink root tolerance allows for sizing. Maintains skin quality and good bulb firmness, allowing for good storability.
MARKETS:	Single centers suitable for onion rings, strong sizing potential for colossal, high yields for bagged market.
ADAPTABILITY:	Adaptable wherever yellow Spanish types are grown

FEATURES

- High quality skin
- Highly uniform shape
- Hard bulbs
- Early – mid season maturity
- Strong basal rot and neck rot resistance

BENEFITS

- Holds up well when stored
- Consistent quality pack out
- Good shipping characteristics
- Early market opportunities
- Improves storage capabilities; season extender

Descriptions, illustrations, photos and disease resistance, etc. are based upon the results obtained under favorable conditions and certain races of pathogens/diseases. Identical results are not guaranteed nor implied for all growing conditions. Information is based on average data compiled. Physical characteristics, adaptability and disease tolerance may vary under different conditions. Rev C
