Hybrid Cabbage Promise

DESCRIPTION:	Medium to large blue green frame. Upright plant frame, nice round oval head. Well adapted to fall –winter season with good uniformity for type, excellent field holding ability. Good multi-use variety.
MATURITY	Matures 105 - 110 days after transplant
COMPARABLE VARIETIES:	Amtrak
CULTURAL CHARACTERISTICS:	Promise has high resistance to fusarium yellows. Plant habit supports medium-large heads with minimal lodging. Harvest early for fresh market, hold for process (short cores).
MARKETS:	Suitable for fresh (box), processing and short storage markets
ADAPTABILITY:	Canada: Quebec, Ontario; US: New York

FEATURES

- Upright habit
- Uniform maturity
- Attractive round shape
- Medium, low core
- Strong field holding ability

BENEFITS

- Mechanical harvest potential
- Effective unit cost returns
- Appealing fresh pack presentation
- Good process recovery rate
- Good multi-use: fresh market, processing

Descriptions, illustrations, photos and disease resistance, etc. are based upon the results obtained under favorable conditions and certain races of pathogens/diseases. Identical results are not guaranteed nor implied for all growing conditions. Information is based on average data compiled. Physical characteristics, adaptability and disease tolerance may vary under different conditions.
